Deadline for manuscript  
submissions:

**30 June 2021**

### Message from the Guest Editor

Medicines administration is an important part of the treatment of many patients. Achieving a therapy tailored to individual patients, with a maximum of therapeutic effects and a minimum of adverse effects, can be challenging. It requires significant efforts by patients, informal caregivers, interprofessional teams of healthcare providers, and the healthcare system. It also involves respectful agreements of all stakeholders on responsibilities throughout the complex process of pharmaceutical care.

This Special Issue of the *International Journal of Environmental Research and Public Health* is devoted to making a substantial contribution to the implementation of pharmaceutical care for the benefit of patients and health services. We welcome manuscripts within this scope, based on varied healthcare settings, patient populations or healthcare professions. We encourage translational research that tests new approaches incorporating person-centred design or technology support or considering implementation strategies.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:**—free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed by the Science Citation Index Expanded (Web of Science), Social Sciences Citation Index (Web of Science), MEDLINE (PubMed), Scopus (Elsevier) and other databases. Full-text available in PubMed Central.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 15.3 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2020).
